

Circular

20 April 2020

To all Local Food Farms / Importers / Manufacturers

All declaring agents are requested to inform the importers of the contents of this circular.

Dear Sir/Madam

MAXIMUM RESIDUE LIMITS ESTABLISHED FOR PESTICIDES AND VETERINARY DRUGS PREVIOUSLY NOT ALLOWED IN FOOD

Maximum limits for incidental constituents in food, commonly termed as “contaminants” are specified under the Food Regulations. The Singapore Food Agency (SFA) continuously reviews and updates maximum limits for incidental constituents under the Food Regulations in order to safeguard consumer health and to meet the changing needs of the food industry. Maximum limits are published on SFA’s website to provide greater transparency to the industry on Singapore’s requirements.

2 The maximum residue limits (MRLs) for pesticides are stipulated under the Ninth Schedule of the Food Regulations. For pesticides which do not have MRLs stipulated under the Ninth Schedule of the Food Regulations, the MRLs adopted by the Codex Alimentarius Commission (Codex) are used. Currently, pesticides of which MRLs have not been established under the Food Regulations or adopted by the Codex Alimentarius Commission should not be detected in food products.

3 Veterinary drugs, as defined under Regulation 29(3) of the Food Regulations, are currently not permitted to be detected in food.

4 To facilitate trade, SFA has assessed the risk on the presence of low levels of pesticide and veterinary drug residues in various food commodities. SFA has established MRLs for pesticides that are currently neither specified under the Ninth Schedule nor adopted by Codex. SFA has also established MRLs for some veterinary drugs instead of applying “not detected” as the default limit. These newly established MRLs for residues of pesticides and veterinary drugs in the food commodities are listed in **Annex A**.

5 The newly established MRLs provide greater clarity and are in-line with the relevant Codex standards or regulatory standards of major developed countries. SFA

has conducted risk assessments to ensure that the consumption of food containing pesticide and veterinary drug residues at levels below these new MRLs is safe.

6 SFA will administer the MRLs for the specified pesticides and veterinary drugs in food commodities listed in **Annex A** with effect from **1 May 2020**. All traders are reminded to ensure that food products made available for sale on or after 1 May 2020 comply with these requirements.

7 The complete list of maximum limits for contaminants in food is available on our website at www.sfa.gov.sg.

ANNEX A: Maximum residue limits (MRLs) for pesticides and veterinary drugs in food

Part 1: Pesticide Residues

In order to facilitate trade, SFA has established new maximum residue limits (MRLs) for various pesticides. These MRLs can be downloaded from the SFA website at this weblink:

[https://www.sfa.gov.sg/docs/default-source/legislation/sale-of-food-act/annex-a-of-circular-dated-20-apr-2020-\(pesticide-mrls\).xlsx](https://www.sfa.gov.sg/docs/default-source/legislation/sale-of-food-act/annex-a-of-circular-dated-20-apr-2020-(pesticide-mrls).xlsx)

MRLs that are marked with an “*” are default MRLs.

In addition to the newly established MRLs that can be downloaded from the weblink above, existing provisions under Regulation 30 and the Ninth Schedule of the Food Regulations for pesticide residues in food will continue to apply. Where the MRLs are not prescribed in the Ninth Schedule, or the list of new MRLs specified, please refer to the MRLs adopted by the Codex Alimentarius Commission.

Part 2: Veterinary Drugs

Veterinary Drugs	Animal Species	Tissue (i.e. Muscle, kidney, liver, eggs, or milk)	Current requirement	MRL (ppb) from 1 May 2020
Thiamphenicol	Cattle	Muscle	Not detected	50
		Kidney		50
		Liver		50
		Milk		50
	Sheep	Muscle	Not detected	50
		Kidney		50
		Liver		50
		Milk		50
	Pig	Muscle	Not detected	50
		Kidney		50
		Liver		50
	Poultry	Muscle	Not detected	50
		Kidney		50
		Liver		50
Florfenicol	Cattle	Muscle	Not detected	200
		Kidney		300
		Liver		3000

Veterinary Drugs	Animal Species	Tissue (i.e. Muscle, kidney, liver, eggs, or milk)	Current requirement	MRL (ppb) from 1 May 2020
	Sheep, Goat	Muscle Kidney Liver	Not detected	200 300 3000
	Pig	Muscle Kidney Liver	Not detected	300 500 2000
	Poultry	Muscle Kidney Liver	Not detected	100 750 2500
Clenbuterol	Cattle	Muscle Kidney Liver Milk	Not detected	0.2 0.6 0.6 0.05
Ractopamine	Cattle	Muscle Kidney Liver	Not detected	10 90 40
	Pig	Muscle Kidney Liver	Not detected	10 90 40
