Egg Traders

Dear Sir/Mdm

### **VETERINARY CONDITIONS FOR IMPORTATION OF PASTEURISED SHELL EGGS**

We would like to inform that SFA has published a set of veterinary conditions for the importation of pasteurised shell eggs. Pasteurised shell eggs are eggs which are subject to in-shell heat treatment, but are not cooked during pasteurisation.

2 The import conditions has been uploaded on SFA's website at the following link:  
<https://www.sfa.gov.sg/docs/default-source/tools-and-resources/resources-for-businesses/veterinary-conditions-for-the-importation-of-pasteurised-shell-eggs.pdf>

3 Pasteurised shell eggs can only be imported from SFA-approved sources. Currently, there are no overseas establishments approved to export pasteurised shell eggs.

4 Traders may work with interested establishments to submit applications for SFA's approval. Application details and form can be found on SFA's website at:  
<https://www.sfa.gov.sg/food-import-export/commercial-food-imports>
