All Exporters of Food Products

Dear Exporters

## **GACC'S GUIDELINES ON PROTECTION AGAINST COVID-19 FOR FROZEN FOOD PRODUCTS**

The General Administration of Customs of China (GACC) had issued two guidelines on protection against Covid-19 for frozen food products on 30 January 2022. All approved overseas establishments and storage facilities have to adhere to the food safety measures in accordance with the guidelines and demonstrate that the preventive measures implemented are adequate to prevent cross-contamination and presence of Covid-19 virus during its production and operation of cold chain food and on the food packaging materials.

To achieve timely dissemination of the latest guidelines received from GACC to companies which are already exporting to China, we are sharing the available version (in Chinese) (Annex A) while the document is currently being translated by SFA into English. In the meantime, companies which require an urgent translation of it into English may approach their own translator to do so. We seek your kind understanding on this matter.
