

List of genome edited (GE) crops that have completed Pathway A* under SFA’s regulatory framework for GE crops

Updated on 04 Nov 2025

No	Crop developer	Crop common name	Crop scientific name	Commercial name	Trait(s)	Intended use (food and/or feed)	Date SFA informed developer of completion
1	Sanatech Life Science Co., Ltd	Tomato	<i>Solanum lycopersicum</i>	High GABA Sicilian Rouge tomato	Increased gamma-aminobutyric acid (GABA) level	Food	30-Oct-25

* Note: Under Pathway A as described in SFA’s regulatory framework for GE crops, crop developers submit information that demonstrates that their crop does not have foreign DNA. Upon receipt of complete information in the Information Checklist, SFA will verify the developer’s determination that the GE crop does not contain foreign DNA based on the information provided. After SFA has verified that the GE crop does not contain foreign DNA, SFA will list the crop herein alongside important disclosable information. SFA will not require these crops to undergo pre-market assessment for genetically modified organisms (GMO).
